

Rockwell Security Inc.

MULTIPOINT LOCKS & TRIM SETS

www.rockwellsecurityinc.com

The Rockwell locksets are designed for discerning homeowners loaded with features they increasingly seek, like the peace of mind afforded by a multipoint locking system with options to fit their security and aesthetic preferences. We've made it easy to offer these benefits as the Rockwell locksets are compatible with standard mounting hole locations and are an exceptional value. What's more, our precision engineered mechanisms will provide years of trouble-free service.

SECURITY AND SAFETY

CONSIDER

- Greater customer appeal - homeowners want the security and comfort afforded by multipoint hardware.
- High strength- heavy gauge construction with maximum security options, precision engineered mechanism provides better structural performance.
- Superior corrosion protection- zinc dichromate steel finish provides unsurpassed protection and stainless steel is available for your toughest applications.
- Options to suit any style- works with wood, fiberglass, vinyl, or aluminum doors matched with complementary Rockwell trim sets.
- Simple manufacturing conversion- compatible with industry standard 5-1/2" CTC double bore hole locations. Minor changes to door preparation.
- Economical- delivering exceptional value for money.
- Easy installation, fewer service calls- easy to handle, one piece construction multipoint locks increases manufacturing efficiencies.
- Greater reliability and durability- quality built into the product to last a lifetime.

Rockwell Multipoint Locking Systems

Rockwell Multipoint locking systems provide additional security with 3 locking points on your door.

FBI figures report a burglary occurs every 15 seconds where 34 percent of burglars enter through the front door. The average loss per break in is \$2,230.

Rockwell Multipoint locking systems provide a deterrent to burglars and help protect your homes. Features include 3 locking points, plus a kickproof, and anti-jimmy lockset.

The Center deadbolts are laminated and hardened with anti-sawing feature.

Rockwell Multipoint locks will not only keep your doors secure, the additional locking points top and bottom also help prevent door warpage and also provides superior insulation preventing air and water infiltration, providing energy efficiency.

The factory installed Multipoint Lock offers a solution to both aesthetics and security.

The multipoint lock being secluded inside the door panel provides a clean look to the door with added safety and security features without the unsightly surface mounted additional locks being installed on a door for added security.

ROCKWELL TL10 MULTIPOINT LOCK FOR AMERICAN ENTRY DOORS

7010 Series - 2-3/4" Backset

Rockwell TL10 multipoint lock with triple latch built for entry doors.

One piece construction maintains door panel integrity while ensuring a simple, trouble free and easy installation.

Automatic independent triple latching points.
Laminated steel, anti-saw, anti-jemmy and kick resistant center deadbolt for maximum security.

90 degree consumer friendly easy locking operation.
Visual lock indicator feature.

Fits standard double bore with 5.5" hole centers and 2-1/8" bore.

Field reversible with a screwdriver.

Precision engineered components for a smooth and reliable operation.

Adjustable strike plates allow for field adjustment.

SPECIFICATIONS

MATERIAL AND FINISH :

Heavy gauge steel construction with coated faceplate

BACKSET : 2-3/4"

HOLE CENTER : 5.5" center to center

DEADBOLT : 1" wide x 1" throw Laminated Steel with anti-saw, anti-jemmy and kick resistant feature.

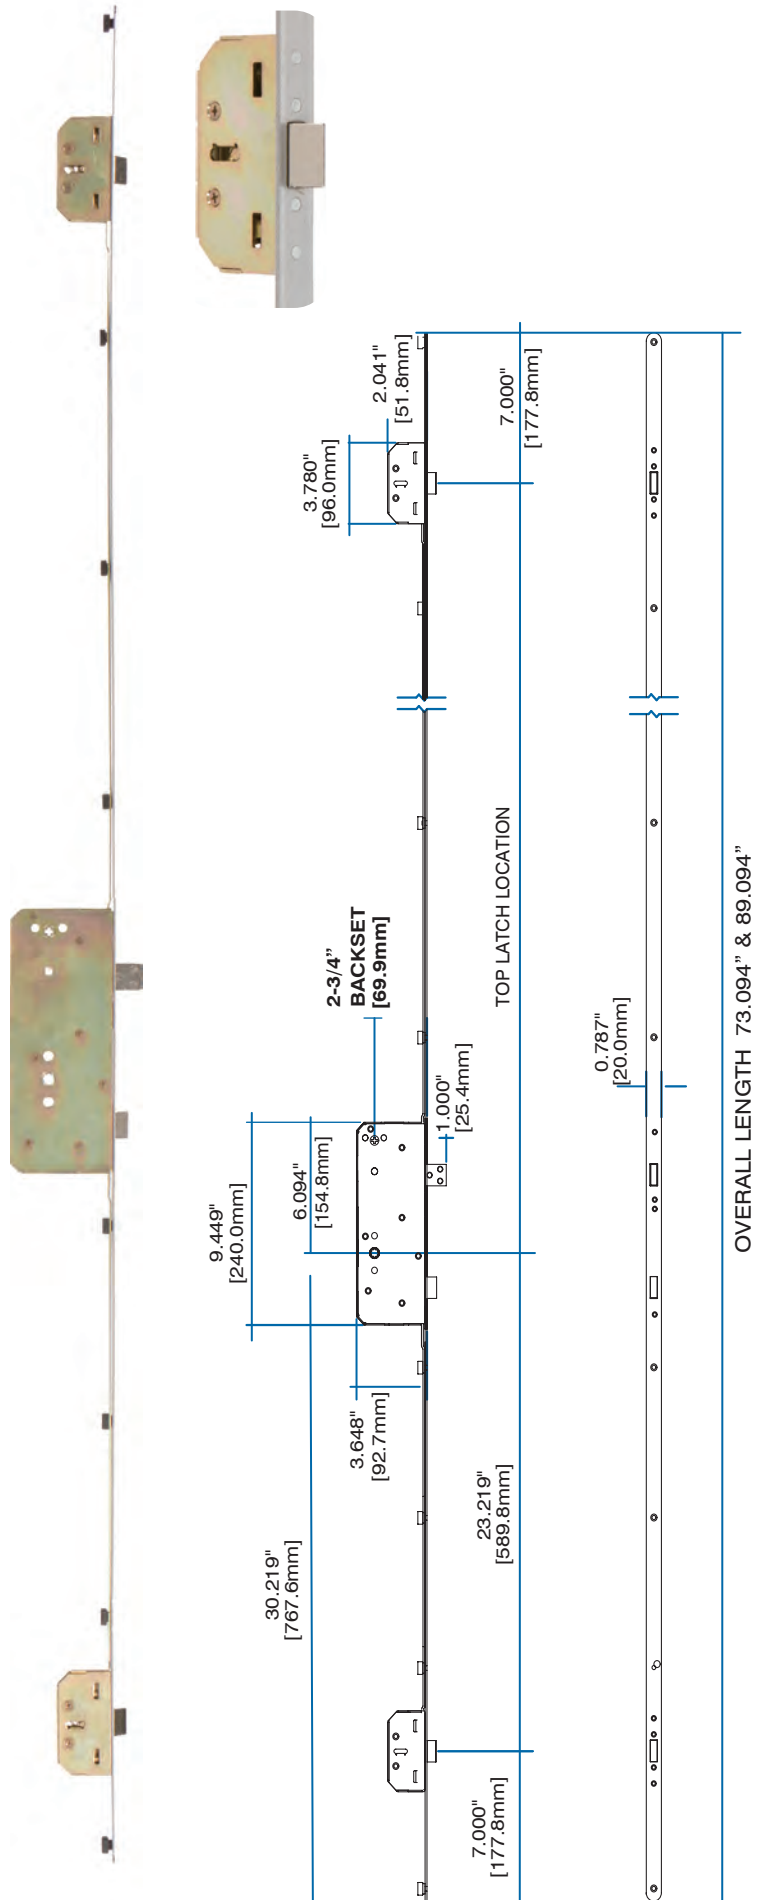

Americanized 90 degree turn

LATCH : 1/2" throw, 45 degree turn

FACEPLATE : 0.787" wide (20mm) Euro-groove application

CYCLE TESTING : Tested to over 100,000 cycles

Part Number	Panel Size	Top Latch Location	Overall Length

Built For Security and Safety

GENERAL DESCRIPTION -

Defender mortise lock for swing doors has a built in Emergency exit feature. Patented Panic push to release feature - in a single motion, pushing down on lever unlocks the deadbolt and retracts the latch simultaneously to allow for an easy exit. Unlock the door with one motion by pushing down the lever to unlock and open the door.

Narrow backset ideal for narrow style doors.

Built for security and safety, the defender mortise lock is Non-handed and field reversible for Left or Right hand doors.

Heavy gauge construction in zinc-dichromate steel. Mounting dimensions conform to general industry practice for Multipoint trims. All locks are compatible with Rockwell swing door handles. Suitable for wood, vinyl, or aluminum doors. Fits 16mm Eurogroove.

SPECIFICATIONS

- **MATERIAL AND FINISH-** Heavy gauge steel with zinc dichromate finish per ASTM-B633.
- **MOUNTING HOLE LOCATIONS -**
Per industry practice
- **HANDLE LOCK HOLE LOCATION - 3.622"**
- **KEY BACKSET - 1.377"**
- **DEADBOLT - 3/4"** throw
- **LATCH - 1/2"** throw
- **HANDING - Non Handed**
TESTED TO OVER 100,000 OPERATING CYCLES.

702 DEFENDER MORTISE LOCK WITH EMERGENCY EGRESS

* For use with all door construction materials

* Field reversible

YORKSHIRE 200 SERIES NARROW STYLE PATIO DOOR MULTIPOINT LOCK

The Rockwell Yorkshire 200 series Narrow Style Multipoint lock with deadlocking hooks top and bottom.

Dual opposing deadlocking hooks provide anti-jemmy and a kickproof feature.

Narrow backset fits most patio doors.

Single Piece construction maintains door panel integrity while ensuring a simple, trouble free and easy installation.

Lever operated Multipoint lock provides maximum compression and sealing between door and frame

Non-handed and field reversible.

Precision engineered components for a smooth and reliable operation.

Multipoint locks are available with compatible Rockwell Narrow Style Multipoint lock door handles.

SPECIFICATIONS

MATERIAL AND FINISH :

Heavy gauge steel construction with Stainless Steel Faceplate. 16mm Eurogroove application.

MOUNTING HOLE CENTER :

Per industry practice

HANDLE TO HOLE LOCATION : 3.622"

KEY BACKSET : 1.377"

DEADBOLT : 3/4" (20mm) throw

LATCH : 1/2" throw

CYCLE TESTING: Cycle tested to over 100,000 cycles

Part Number	Material
20212200	Steel

ROCKWELL TL10 MULTIPOINT LOCK FOR AMERICAN ENTRY DOORS

Eurolox Narrow style Multipoint mortise lock for garden or patio doors are available with deadlocking hooks top and bottom.

One piece construction maintains door panel integrity while ensuring a simple, trouble free and easy installation.

Triple locking points provide security and the lever operated hooks provide maximum compression and sealing across the door and frame. Precision engineered components for a smooth and reliable operation.

Mounting dimensions conform to general industry practice for Multipoint trims.

All locks are available with compatible Rockwell Narrow Style multipoint swing door handles

Suitable for narrow style wood, vinyl, or aluminum doors.

Field reversible with a screwdriver.

Adjustable strike plates allow for field adjustment.

SPECIFICATIONS

MATERIAL AND FINISH :

Heavy gauge steel with zinc dichromate finish per ASTM-B633

MOUNTING HOLE CENTER : Per Industry practice

HANDLE TO HOLE LOCATION : 3.622"

KEY BACKSET : 1"

DEADBOLT : 3/4" throw

FACEPLATE: 18mm Eurogroove application.

CYCLE TESTING: Tested to over 100,000 cycles

NARROW STYLE CONTEMPORARY MULTIPOINT LOCK TRIM SET WITH DAHLI LEVER

6260 Series

MATERIAL: Solid Forged Brass Construction

DOOR THICKNESS : 1-3/4" or 2-3/8"

CYLINDER : 90 degree Europrofile Cylinder

Part Number	Finish
62603304	Oil Rubbed Bronze
62603371	Brass
62603303	Brushed Nickel

NARROW STYLE CONTEMPORARY MULTIPOINT LOCK TRIM SET WITH DELTA LEVER

6263 Series

MATERIAL: Solid Forged Brass Construction

DOOR THICKNESS : 1-3/4" or 2-3/8"

CYLINDER : 90 degree Europrofile Cylinder

Part Number	Finish
62633304	Oil Rubbed Bronze
62633303	Brushed Nickel

NARROW STYLE WINDSOR MULTIPOINT LOCK TRIM SET

6109 Series

MATERIAL: Solid Brass Drop Forged Construction
CYLINDER : 90 degree Europrofile Cylinder
DOOR THICKNESS: 1-3/4" or 2-3/8"

NARROW STYLE 6500 MULTIPOINT LOCK TRIM SET

2026 Series

MATERIAL: Solid Forged Brass Construction
DOOR THICKNESS : 1.5" or 1-3/4"
CYLINDER : Anti-bump, 5 pin SC1 keyway, pin depths and increments.

Part Number	Finish
61093304	Oil Rubbed Bronze
61093371	Brass
61093303	Brushed Nickel

Part Number	Finish
20265001	Brass
20265003	Brushed Nickel
20265014	Black

51285368BS	Entry	85 MM
51285166BS	Dummy	85 MM
5129233BS	Entry	92 MM

NARROW STYLE 5128 MULTIPOINT LOCK TRIM SET

5128 Series

MATERIAL: Stainless Steel

DOOR THICKNESS : 1-3/4" or 2-3/8"

CYLINDER : Anti-bump, 5 pin SC1 keyway, pin depths and increments.

Part Number	Finish
51105551	White
511055514	Black

NARROW STYLE 5100 MULTIPOINT LOCK TRIM SET

51105 Series

MATERIAL : Aluminum construction

FINISH : WHITE

DOOR THICKNESS: 2-3/8"

HIGH PERFORMANCE ADJUSTABLE LIFT OFF CONCEALED BALL BEARING HINGE

Rockwell Hi-Performance Dual Vertical and Horizontal adjustable hinge comes standard with a Lift off feature along with a concealed ball bearing and a Non-Removable Pin.

Lift-Off Feature

The Lift-Off Feature allows for a Faster installation and removal of the door panel where NO Tools are Required, saving time and money.

Conveniently transport and prevent damage to doors on the job site by easily removing and reinstalling the door panel. No removal of pins or screws to remove the door.

Hi-Performance

Independently third party tested to exceed ANSI/BHMA 156.1 Grade 3 standard for 350,000 cycles with 3 hinges on a 180 lbs Door panel.

Adjustability

Dual vertical and horizontal adjustment comes standard on all hinges. No separate set and guide hinges.

1/4" Vertical Adjustment and 0.15" horizontal adjustment with Visual adjustment indicator. Drift prevention feature ensures adjusted hinges do not drift or move out of the adjusted position.

Adjust vertically and horizontally with a hand screwdriver. Combination head screw avoids screw stripping issues.

One step routing simplifies door preparation. Fits industry standard template.

Strength and Durability

Heavy Gauge All Metal Construction.

No Plastic or Synthetic Parts.

Heavy Duty 7/16" diameter Pin for extra strength.

Concealed ball bearing located inside the hinge knuckle for an aesthetically cleaner look.

Smooth Operation

Concealed Hardened 3/8" Ball Bearing ensures ease of operation and improves cycle life.

Security

Built-in Non-removable Pin comes standard making it suitable for both Inswing and Outswing applications.

Maximum adjusted door weight : 180 lbs. 3 hinges.
240 lbs. 4 hinges

HIGH PERFORMANCE ADJUSTABLE LIFT OFF CONCEALED BALL BEARING HINGE

Rockwell Hi-Performance Lift-Off Hinge Technical Data Sheet

Part Numbers: 1228 series and 1230 series

Hi-Performance Lift Off Hinge is suitable for Medium to high frequency Residential door applications according to **ANSI/BHMA 156.1**. The Rockwell Hi-Performance Hinge has been independently tested to exceed ANSI/BHMA 156.1 with 3 hinges on a 180 lbs door for 350,000 cycles.

Minimum Door Thickness: 1-3/4" (44mm)

Maximum Adjusted Door Weight with 3 hinges: 180 lbs.

Maximum Adjusted Door Weight with 4 hinges: 240 lbs.

Installation Instructions

Rockwell Hi-Performance Lift Off Hinges are Handed.

The Hinge body with the Pin is fitted onto the door panel with the Pin Pointing Down.

The Hinge leaf with the Knuckle is installed on the door Frame with the knuckle hole pointing up to receive the Pin.

Hi-Performance Lift Off Hinges are precisely manufactured with minimum clearances or play. Ensure the Hinge Body and Hinge leaf are accurately installed on both horizontal and vertical planes and the axis of the Hinge Pin and Hinge Knuckle are Inline.

Hi-Performance Lift Off Hinges are pre-lubricated. Depending on the extreme weather conditions the hinge may need lubrication. Lithium Grease is the recommended lubricant.

Please take care not to damage the Stainless Steel Washer when assembling the door panel to the Frame.

Prepare the Door Panel and the Frame. Mark and Mortise both the door panel and Frame.

Drill Pilot holes, in the size to suit the door material being used.

Fasten hinge bodies to the Door Panel using #10 screws. Minimum 1-1/4" length is recommended on the door Panel.

Ensure the hinge Pin is pointing down.

Fasten the hinge leaf onto the Door Frame, #10 by minimum 3/4" length is recommended. One screwhole is typically left out without a screw and is installed with a 1-1/2" or 2" long screw to reach the stud after the door is positioned into the rough opening.

Screw Lengths and types vary depending on the materials utilized. Ensure screws are fully tightened.

Hinges are pre-set in the Mid-position for 4 way adjustment. Do not adjust hinge until it is positioned into the rough opening to ensure maximum 4 way adjustment. Always adjust hinges vertically prior to horizontal adjustment.

Hinge Positioning

For best results and maximum resistance against warping position the hinges with equal spacing as illustrated.

Rockwell Security Inc.
